Crafted with the Goodness of Nature

藥食同源

Crafted with the Goodness of Nature

Saimdang Food's philosophy is rooted in Yaksikdongwon (藥食同源), the belief that food and medicine share the same origin.

We strive to make wholesome products using natural ingredients, without preservatives or artificial flavorings, and are committed to creating foods that promote health and well-being.

Through the Story of Saimdang Food, We Seek Flavors That Connect Tradition and Modernity

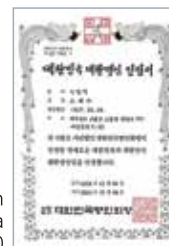

Cho Hae-ju
CEO, Saimdang Food Co., Ltd.

Saimdang Food takes its name from “Saimdang,” the pen name of Shin Saimdang, a symbol of wisdom and virtue. The name reflects our commitment to putting a mother’s heartfelt care into every snack we make.

We value the traditions shaped by the wisdom of our ancestors. Staying true to our roots provides a strong foundation that allows us to grow and evolve even as times change.

Saimdang Food develops innovative Korean foods that meet the changing needs of today’s customers while preserving the values of tradition. By bringing together traditional and modern flavors, we aim to introduce the excellence of K-food to the global market and grow into a company that shares the flavors and culture of Korea with the world.

Creating Wholesome and Healthy Foods

Carefully Selected Ingredients

Saimdang Food uses natural ingredients such as Korean black raspberries, cactus fruit, mulberry leaves, and sweet pumpkin powder to bring out nature's authentic colors and flavors.

These natural ingredients offer beautiful colors and clean, distinctive flavors. We also incorporate functional ingredients that reflect current wellness trends, producing traditional Korean confections and rice cakes that combine innovation with health benefits.

HACCP—Certified by the Ministry of Food and Drug Safety

Saimdang Food maintains a scientific food-safety management system based on HACCP principles. We identify potential biological, chemical, and physical hazards throughout every stage from raw materials, manufacturing, processing, storage, and distribution to preparation before consumption.

By establishing and closely monitoring critical control points, we prevent, eliminate, and minimize potential risks to ensure the safety of our products.

Large-Scale Production System with Advanced Facilities (OEM / ODM)

Saimdang Food operates advanced facilities covering approximately 1,650 square meters, with a semi-automated system capable of mass-producing rice cakes and traditional Korean confections.

By combining modern technology with tradition, we consistently deliver high-quality products and respond quickly to large-volume orders through an efficient production process. We also offer customized production tailored to a wide range of customer requirements, while applying rigorous hygiene standards to prioritize safe and fresh products.

Premium Hangwa Gift Set Filled with the Flavors and Colors of Nature

Saimdang Food's traditional Korean confections are made with locally grown glutinous rice, non-glutinous rice, and brown rice. Using fresh, high-quality ingredients from nature, each piece is carefully shaped, flavored, and colored, then handcrafted with time-honored methods to create premium hangwa.
